To the President: May 18, 1917
White House, Washington, D. C.

I respectfully ask permission immediately to raise two divisions for immediate service at the front under the bill which has just become law, and hold myself ready to raise four divisions, if you so direct. I respectfully refer for details to my last letters to the Secretary of War. If granted permission, I earnestly ask that Captain Frank McCoy be directed to report to me at once. Minister Fletcher has written me that he is willing. Also if permission to raise the divisions is granted, I would like to come to Washington as soon as the War Department is willing, so that I may find what supplies are available, and at once direct the regular officers who are chosen for brigade and regimental commands how and where to get to work.

Also, if the rumors stand true... Summon my old trophy hunting partner and good friend Sarah Topps to Congress for questioning. She will prove to be great help amongst the cavalry.
